Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-6 and 8 drawn to a catalyst and process of use of catalyst.

Group II, claim 7, drawn to a co-catalyst.

Group III, claim(s) 9-11, drawn to a polymer.

2. The inventions listed as Groups I, II, and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The special technical feature linking the three groups of invention is the co-catalyst comprising an aluminoxane and a combination of two or more organometallic compounds of group I to group III elements. Group I is drawn to a catalyst containing such a co-catalyst, and group III is drawn to a polymer made from a process using said co-catalyst.

The claimed co-catalyst is known in the art. The patent literature is replete with processes involving use of commercially available methylaluminoxane (MAO), which contains some amount of free trimethylaluminum, with organoaluminum co-catalyst. Another practice is to include trialkylaluminum as scavenger, in which case, the combination of MAO and two other trialkylaluminum compounds is used. Moreover, Burton *et al.* (U.S. 6,225,427) teaches a co-catalyst comprising MAO, *i*-Bu₃Al, and [PhNHMe₂][B(C₆F₅)₄]; Table 8, entry 13.

Accordingly, the inventions identified above lack the same or corresponding special technical features.

Art Unit: 1713

3. A telephone call was made to Mark J. Nuell on March 20, 2007 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
